

Impact Value Criteria

Name	Description
Low Impact	Would cause minimal disruption or damage. Their effects are easily manageable and may require minimal resources to address.
Medium Impact	Might cause a moderate amount of disruption or harm. These risks can have an impact on project performance and may need significant resources or changes in strategy to handle effectively.
High Impact	Would create major disturbance, damage, or injury. These risks have the potential put at risk the entire project or result in severe financial, legal,

	or reputational consequences.
